

# 1 Introduction

Welcome to Dalis! This is the Unix setup i have built over the years with maximum efficiency in mind!  
This manual will cover all bindings and configuration you can do!  
Later i will explain how my personal scripts work and how the file system is organized.

## 2 Index

## 3 Starting out

If you are reading this you *probably* installed the system already but in the case you still haven't the next section is for you, otherwise just skip it.

### 3.1 Running the wizard

After installing one of the supported operating systems you can run its install wizard! It is located in `repo/install/(distro)/wizard`.

## 4 Post Install

After installing the script,

## 5 Bindings

Here are all the bindings you need to know:
